PAST PART □ In this dictionary PAST PART is used in the grammar notes beside entries to refer to the past participle of a verb. The past participle of most verbs in English is formed with an *-ed* ending, for example *helped* and *walked*. These have the same spelling as the past tense of the verb. A few verbs have irregular past participle forms, for example *broken* and *given*. The past participle is used in forming two main kinds of verbal group in English: perfect tenses and passives. When it is used to form a perfect tense, the past participle comes after a form of the auxiliary *have*. EG *You **have helped** me a lot... He **had walked** along this road before.* When it is used to form a passive, it comes after a form of the auxiliary *be*. EG *She **was** greatly **helped** by psychotherapy.* See □ at PASS. The past participle of some verbs is used as an adjective. You can say *She has **broken** his heart*, and you can also say *...a **broken** heart* and *His heart is **broken**.*

PHR □ In this dictionary PHR is used in the grammar notes beside entries to mean 'phrase' or 'expression'. Examples are **for life**, at **life 12.2**, **a blessing in disguise**, at **blessing**, and **keep tabs on**, at **tab**. Where a phrase normally has a particular clause function, such as adjunct, complement, or object, this function is mentioned in the grammar note. Thus, **for life** is described as PHR: USED AS AN A because it normally functions as an adjunct. EG *She agreed to be my friend **for life**... Their faces were scarred **for life**.* **A blessing in disguise** is described as PHR: USED AS C because it normally functions as a complement. EG *A crisis can be **a blessing in disguise**... This attack proved **a blessing in disguise** for France.* In many phrases, one or more of the words in the phrase can be inflected to fit into different clause structures. Where this is so, it is mentioned in the grammar note. An example is **to keep tabs on**, described as PHR: VB INFLECTS. The verb inflects but the noun *tabs* is always used, as shown, in the plural. EG ***I kept tabs on** him.* You cannot say 'I kept a tab on him'. In other cases, the wording of the phrase cannot normally be inflected. Examples are **a fly in the ointment** at **ointment**, and **wouldn't hurt a fly** at **fly 18**. You say ***The fly in the ointment** is that they don't want to go.* You cannot say 'These problems are flies in the ointment'. You say *Peter **wouldn't hurt a fly**.* You cannot say 'Peter did not hurt a fly' or 'Peter wouldn't hurt flies'. In this dictionary, additional information is given where necessary to show restrictions on the phrase or to indicate what follows it. An example is **turn a deaf ear** at **deaf 5**, described as PHR: VB INFLECTS, IF+PREP THEN *to*. This means that the verb *turn* inflects, although the noun *ear* does not, and that if the whole phrase is followed by a prepositional phrase, the preposition *to* starts the prepositional phrase. EG *Young people sometimes seem to **turn a deaf ear** to the words of their anxious parents.* Another example is **take a delight,** at **delight 2**, described as PHR: VB INFLECTS, USU+*in*+ING. This means that the verb *take* inflects, although the noun *delight* does not, and that the whole phrase is usually followed by *in* + a verb in its -ING form. EG *He **takes a positive delight** in being hurt.*

PHRASAL VB □ In this dictionary PHRASAL VB is used in the grammar notes beside entries to mean 'phrasal verb'. Phrasal verbs are explained at the end of the relevant verb entry. A phrasal verb is a combination of two words with a single meaning. One word is a common verb and the other word is a preposition or one of the common adverbs such as *up*, *down*, and *across*. In a few cases, both an adverb and a preposition can be used. Examples of phrasal verbs are **come across**, meaning 'discover', as in *I **came across** a problem*, and **take off**, meaning 'mimic', as in *She used to **take off** Mrs Thatcher.* If the verb is used with a preposition (PREP), it must be followed by a noun group, which functions as a prepositional object. If it is used with an adverb (ADV), it does not need to be followed by anything. In addition to the ADV or PREP, the verb itself may be transitive or intransitive. The main patterns of phrasal verbs are as follows: **1** V+ADV describes a phrasal verb in which the verb is intransitive and is followed by an adverb. Examples are **burn down** and **butt in**. EG *The mansion **burned down** four years ago... You can't just **butt in** when other people are talking.* **2** V+PREP describes a phrasal verb in which the verb is intransitive and is followed by a preposition. Examples are **come across 1** and **stand by 3**. EG *I **came across** an old French saying about priests... In that case I **stand by** what I said.* Sometimes the prepositional object can become the subject of a passive clause. When this is possible, the grammar note says V+PREP, HAS PASS. Examples are **look after 1** and **see to**. You can say *The children **were looked after** by a succession of young girls* as well as *A succession of young girls **looked after** the children.* You can say *It's all right, it **is being seen to*** as well as *It's all right, someone **is seeing to** it.* Extra information is sometimes given about what follows the prepositional object. An example is **take to**, as in *He **took to** wearing leather jackets*, which is described as PHRASAL VB: V+PREP+*-ing*, because the preposition is followed by an *-ing* form. **3** V+O+ADV describes a phrasal verb in which the verb is transitive and is followed by an adverb. Examples are **bring up 1** and **iron out**. EG *I had a struggle to **bring** the family **up**... Some women choose to stay at home and **bring up** their children... Technology enables us to **iron out** the natural problems.* These transitive phrasal verbs can be used in the passive, unless the grammar note tells you that they cannot. EG *The children **were brought up** by their mother... There are anomalies which **will be ironed out**.* In this type of phrasal verb, the object of the verb can normally come either before or after the adverb. If the object is a pronoun, it comes before the adverb, as in *They **took** him **on.*** If the object is a longer noun group, it usually comes after the adverb, as in *They **took on** nearly a hundred school leavers and young trainees.* If the object is a fairly short noun group, it may come before or after the adverb. There are some phrasal verbs of this type where the object of the verb comes before the adverb. There are others where the object comes after the adverb, unless the object is a pronoun. These are described in the grammar notes as PHRASAL VB: ORDER V+O+ADV and PHRASAL VB: ORDER V+ADV+O. Examples are **keep down** and **give up**. EG *The main aim is to **keep** development costs **down**... I am trying to **give up** smoking.* You do not normally say 'I am trying to give smoking up.' **4** V+O+PREP describes a phrasal verb that is transitive and is followed by a prepositional group. Examples are **talk into**, **drag into**, and **hold against**. EG *We **talked** Donald **into** leaving his job... I pointed out that it was the politicians who **were dragging** politics **into** sport... They **will hold** that **against** you when you apply next time.* **5** V+ADV+PREP describes a phrasal verb in which the verb is intransitive and is followed by an adverb and a preposition. The preposition always comes after the adverb. Examples are **look forward to**, **get away with** , and **go through with**. EG *I began to **look forward to** their visits... We **got away with** it... She vowed she would **go through with** it.* **6**

V+O+ADV+PREP describes a phrasal verb in which the verb is transitive and is followed by an adverb and a preposition. The preposition always comes after the adverb. The object of the verb can come between the verb and the adverb, or after the adverb and before the preposition. An example is **take out on**. EG *She took out her unhappiness on her husband... PRON □ In this dictionary PRON is used in the grammar notes beside entries to mean 'pronoun'. Pronouns are used like noun groups, and there are several different kinds of them. **1** Personal pronouns refer to the people involved in conversations. There are special forms for the subject position *(I, he, she, we, they)* and for the object position *(me, him, her, us, them)*. The pronouns *you* and *it* do not change in form. For further details, see the entries for each word. **2** The words *this*, *that*, *these*, and *those* are called demonstrative pronouns, and are used in referring to things that have been mentioned or that are present in the situation. EG ***That** is a nice dress... I do like **these.*** For further details, see the entries for each word. **3** Most pronouns act as noun groups and are not used with modifiers such as adjectives. The word *one* is often called a pronoun, but it has a different function, because it must have some sort of modifier or qualifier. EG *That's just **one** of the things I like about him... ...an easy **one** to handle.* **4** For other pronouns, see □ at PRON INDEF, PRONPOSS, and PRON REFL. **5** A number of other words in the noun group are called pronouns if there is no noun that they modify. Examples are determiners such as *some, enough*, and *all*; and a few adjectives such as *same*. EG *I think five dollars should be **enough**... ...the **same** as any other job... quote /kwəʊt/, **quotes, quoting, quoted**. **1** If you **quote** someone or something, you repeat the exact words that they have written or said. EG *He was quoted in his local evening paper as saying: 'A lot of people will suffer as a result of this decision.'... They believed that the working class were somehow 'different from us', to quote Lord Curzon... He wanted to show off his ability to quote from the Fourth Psalm... She quoted the Chinese proverb about lighting candles.*

5 Quotes are, in informal English, quotation marks.

N PLURAL

6 In informal English, you can say **'quote'** in front of a word or phrase when you want to indicate that you are repeating what someone else wrote or said, and that you do not think it was the appropriate or right word to use. The word or phrase is often followed by 'unquote'. EG *It will not show up against quote 'similar' unquote backgrounds and this sort of thing.*

QUOTE □ In this dictionary QUOTE is used in the grammar notes beside a verb to mean that it is used with quoted speech, also called direct speech. Examples are **say, shout**, and **suggest**. EG *'What are you doing, Henry?' says Myra... 'If anything comes up, Willie,' Nichols was saying, 'I'll let you know.'... A man came running out of the ward shouting: 'It's a girl!'... 'Albert!' she shouted... 'Perhaps,' he suggested, 'it was just an impulse.'* Verbs that take QUOTE usually also occur with reported speech. See □ at REPORT-CL.

quoth /kwəʊθ/ is a very old-fashioned word that means the same as 'said'. It is only used in the past tense, usually as a third person singular, and it always follows the subject of the verb. It is now used mainly humorously. EG *'Would it bore you very much,' quoth Hazel, 'to come with us tomorrow for a swim?'*
